

Presidents report

Denmark 2020

**Dansk
Maskinhandlerforening**

*Sikkerhed & kvalitet
siden 1918*

As all over the world Corona / covid-19 has overshadowed everything
We are also an employers union and as such much of our time
consumption has been related to advising our member companies
related to this.

85% of the members has not been affected negatively by covid-19. For
their main customers, the farmers, it has been business as usual.

The remaining 15% has been hit quite hard due to the fact that their
customers are counties and contractors working for the state and as
such effected by the national restrictions in the spring

All national fairs, exhibitions etc. has been cancelled in 2020

Sales in general of agro equipment has not been effected negatively

As most countries worldwide DK are now facing the second wave of
covid-19 and are met by travel restrictions etc.
