Le métier

employés par les agriculteurs. Il vend aussi du matériel, comme des tracteurs ou des moissonneuses.

Le travail

Il mesure et contrôle les éléments électroniques sophistiqués du véhicule. Il règle le matériel neuf en

Le lieu de la profession

Les qualités essentielles

Les cultures n'attendent pas. Le mécanicien doit réparer les machines le plus vite possible.

Les outils et les machines sont lourds, les positions de travail inconfortables. Une bonne condition physique est indispensable pour exercer ce métier
